

CRIMPING MACHINES TM-2.0

Product Description

Model: TM 2.0 Side feed and vertical feed terminal crimping high-speed machine.

Features

- The use of advanced electronic control, with high precision, imported electromagnetic clutch/brake, move fast, and accurate.

- Low noise, low power consumption, feeding standards, high efficiency.
- A wider range of height adjustment, higher regulation accuracy, saving time for crimp height adjustment.
- Maybe in the configuration direct-card mode transverse mode to send cards to achieve universal crimping.

Specification

Model	TM-2.0
Pressing Force	2.0 ton
Dimension	280X320X650MM
Motor Power	0.75KW
Power Supply	AC220V 50/60HZ
Stroke Length	30MM (Can Set 40MM)
