

## CORD WINDING & BINDING MACHINE TM-2000

### Product Description

Cord Winding & Binding Machine TM-2000

#### Specification

|                 |           |
|-----------------|-----------|
| Model           | TM-2000   |
| Power Voltage   | AC220v    |
| Mains Frequency | 50hz/60hz |
| Rated Power     | 120w      |

|                          |                                   |                        |
|--------------------------|-----------------------------------|------------------------|
| <b>Winding Size</b>      | can adjust                        |                        |
| <b>Number of Winding</b> | can adjust                        |                        |
| <b>Applicable Scope</b>  | binding length                    | maximum diameter scope |
|                          | 80-120mm                          | φ10-20mm               |
|                          | 120-160mm                         | φ20-35mm               |
| <b>Number of Binding</b> | could set (suggest 3-6 laps)      |                        |
| <b>Ribbon</b>            | plastic bags iron core            |                        |
| <b>Protector</b>         | fuse failure warning closing down |                        |
| <b>Size LxWxH</b>        | 400x380x580mm                     |                        |
| <b>Gross Weight</b>      | 40kg                              |                        |
